Intermediate Organic Chemistry Lab I
(CHEM 2100/3100, CRN 88453/88452, 2 credits)
Fall 2016

Instructor: Dr. Joan Mutanyatta-Comar
Office: PSC381; Tel.# 404-413-6544
E-mail: jmutanyattacomar@gsu.edu
Office hours: MWF: 10:00 am – 12:00 noon. Any other time by appointment.

Pre-lab Lecture: Thursday - 8:00 am - 8:50 am. (Room: PSC362)
Lab: Thursday - 9:00 am - 12:45 pm. (Lab PSC357)

Communication:
1. Please send emails to me from your GSU e-mail account, (e.g., jcole1@student.gsu.edu). Please put the course name in the subject of your email. (Do not email me from iCollege)
2. Please check iCollege daily for class announcements and updates

Learning outcomes: Students in this class will:
- Learn techniques such as solid-liquid and liquid-liquid extraction, recrystallization, simple distillation, fractional distillation, IR spectroscopy, mass spectroscopy and gas chromatography.
- Perform extraction and purification of compounds from natural products such as tea leaves and nutmeg.
- Synthesize an ester
Project Overview:
This course is divided into two major parts:

Part 1
- **Week 1-5** will cover techniques for isolation, separation and characterization of organic compounds. The fourth experiment will be synthesis of an ester.
- The Midterm Report (due week 6) will be based on the four experiments: (1) extraction of trilmyristin from nutmeg, (2) extraction of caffeine from tea leaves, (3) separation of benzoic acid and acetanilide and (4) esterification of acetic acid (synthesis).

Part 2
- **Week 6-14** will be on purification and identification of unknowns. This involves simple distillation of an unknown pure liquid (one component) and fractional distillation of an unknown binary mixture (two liquids).
- Final Report (due December 1) will be on the neat liquid (from simple distillation) and the low boiler and high boiler (obtained by fractional distillation).

**Grading Scheme:**
- Final Exam: 100 pts
- Final Report: 100 pts
- Midterm Report: 50 pts
- Homework, Notebook, quizzes, preprn. Etc.: 150 pts

**Total Pts** 400

**Tentative Letter Grades:**
- **A+** = 96% and above
- **A** = 92%
- **A-** = 89%
- **B+** = 86%
- **B** = 82%
- **B-** = 78%
- **C+** = 76%
- **C** = 72%
- **C-** = 68%
- **D** = 64%
- **D-** = 60
- **F** = < 60%
NOTES:
1. Attendance to lecture and lab will be recorded (sign-in/out of lab required). Absences can result in loss of points and lower grades.
2. Bound lab notebooks are required the first day of lab. All entries MUST be made in ink at the time the experiment is being carried out. Notebooks must be submitted with the Final Report and should be collected not later than two weeks into the new semester. Please see more details in lab manual.
3. Safety glasses/goggles: These may be purchased at the GSU bookstore, the Georgia Bookstore, and most hardware stores. They can also be purchased from the chemistry lab coordinator. Students who are unable or forget to bring their glasses may buy a pair from the Lab Coordinator by filling out a breakage form in the lab. Students who obtain glasses in this manner will pay for them at the time they check-out of the lab. Safety glasses/goggles must be worn at all times. Students will not be allowed into the lab without their glasses/goggles.
4. Students must bring safety glasses/goggles and closed toe shoes on the first day as synthesis will begin immediately after check-in.
5. Failure to follow safety procedures will result in expulsion from that lab session with no make-up allowed and loss of credit.
6. The midterm report, final report and final exams will not be returned. They will be available for review in the instructor’s office.
7. Midterm, Final Report and Final Exam grades will not be posted on iCollege.
8. Final grades are only available on PAWS/GoSolar. They will not be posted on iCollege. Please note that grades cannot be given to students by phone, or email.
9. No make-up for Final Exam

Class Preparation and attendance:
Students are expected to attend all lab sessions. Please arrive on time as important pre-lab advisories will be given at the beginning of each session. Students are individually responsible for the timely completion of all assignments, absence being no excuse. Suggested reading assignments given during the course of a lecture should be completed before the next lecture and will constitute quiz material.
Chemistry Departments Student Integrity Policy:
The University requires that faculty members must, on a date after the mid-point of the course to be set by the Provost (or his designee)

1. Give a WF to all students who are on their rolls but are no longer taking the class
   and
2. Report the last day the student attended or turned in an assignment.
   Students who are withdrawn may petition the Departmental Chair for reinstatement into their classes.

Keys to success in the organic chemistry lab:
Students who do well in this course possess the following characteristics:

- **Attend pre-lab lecture and lab:** There is a very good correlation between class attendance (on time) and how well a student will do in this course.
- **Are prepared:** You will get the most out of class if you have reviewed the experimental procedures before coming to each pre-lab session.
- **Ask questions:** If you don’t understand something, ask the instructor in class, during lab, after class, or during office hours.
- **Collect all returned graded quizzes.** They go over the questions they got wrong and ask the instructor for clarification. This way they don’t make the same mistake again.
## Tentative Laboratory Schedule

The lab/lecture schedule listed in the GSU, Chemistry Department laboratory manual will be adhered to as far as is possible. Below is a detailed, tentative schedule.

<table>
<thead>
<tr>
<th>Week #</th>
<th>Tentative Lecture Emphasis (lab work)</th>
<th>Reading Assignments (Read/Do before lecture)</th>
</tr>
</thead>
</table>
| Week 1         | • Safety video, safety exam, objectives of the course, check-in; begin  
• **Experiment 1**: Extraction of trimyristin from nutmeg; recrystallization                                                                                                                                                    | • Experiment 2 from the lab manual  
• Experiment 3 from the lab manual  
• Watch Youtube Video 1 on IR spectroscopy on iCollege and write notes on your powerpoint slides (class notes)  
**Wilcox & Wilcox: pp 234-253; McMurry 9th Ed, pp 368-383)**                                                                                                               |
| August 25      |                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                         |
| Week 2         | • **Pre-Lecture Quiz 1** (based on Experiment 2)  
• Notebook Check 1  
• **Experiment 2**: Extraction of Caffeine from tea leaves                                                                                                                                                                      | • Experiment 4 from the lab manual  
• Watch Youtube Video 2 on IR spectroscopy on iCollege and write notes on your powerpoint slides (class notes)  
**Wilcox & Wilcox: pp 234-253; McMurry 9th Ed, pp 368-383)**                                                                                                               |
| September 1    |                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                         |
| Week 3         | • **Pre-Lecture Quiz 2** (base on experiment 3)  
• Sublimation of Crude Caffeine  
• **Experiment 3**: Extraction of Benzoic Acid/Acetanilide                                                                                                                                                        | • Experiment 4 from the lab manual  
• Watch Youtube Video 2 on IR spectroscopy on iCollege and write notes on your powerpoint slides (class notes)  
**Wilcox & Wilcox: pp 234-253; McMurry 9th Ed, pp 368-383)**                                                                                                               |
| September 8    |                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                         |
| Week 4         | • **Pre-Lecture Quiz 3** (based on experiment 4)  
• **Experiment 4**: Esterification of acetic acid (synthesis) and purification  
• Format of the Midterm Report                                                                                                                                                                                          | **Practice Problems: IR**  
• **Wilcox & Wilcox:** Question 3: pp 253  
• **McMurry 9th Ed Q12.7, 12.8, 12.9, 12.10, 12.31, 12.32, 12.34a, c,**                                                                                                                                             |
| September 15   |                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                         |
| Week 5         | • **Quiz 1** (Experiments 1-4)  
• Notebook check 2  
• Make up lab  
• Write Midterm Report                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                         |
| September 22   |                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                         |
| Week 6         | • Submit Midterm Report  
• Simple distillation of a neat liquid                                                                                                                                                                                                                                                   | • Review IR spectroscopy  
• Distillation: Wilcox & Wilcox (pp 43-69)  
• Chromatography: Wilcox & Wilcox (pp 122-147)                                                                                                                                                                             |
| September 29   |                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                         |
| Week 7         | • Fractional distillation of a binary mixture  
• Gas chromatography - theory  
• In-Class Activity: IR                                                                                                                                                                                                       | • Distillation: Wilcox & Wilcox (pp 43-69)

**NOTE:**

*Students with Disabilities:* Students who wish to request accommodation for a disability may do so by registering with the Office of Disability Services. Students may only be accommodated upon issuance by the Office of Disability Services of a signed Accommodation Plan and are responsible for providing a copy of that plan to instructors of all classes in which an accommodation is sought.

*A student who intends to observe a religious holy day should make that intention known in writing to the instructor prior to the absence. A student who is absent for the observance of a religious holy day shall be allowed to take an exam or complete an assignment scheduled for that day within a reasonable time after the absence.*

*Your constructive assessment of this course plays an indispensable role in shaping education at Georgia State. Upon completing the course, please take time to fill out the online course evaluation.*

*Deviations from this syllabus may be required.*
